## FAQ's:

### What is Alma Ted?

*Alma Ted is a revolutionary, non-invasive treatment. When used with a topical hair care formula, it promotes improved blood flow to the scalp which results in thicker, stronger hair.*

### How does it work?

*Alma Ted is an ultrasound-based system that leverages acoustic sound waves to promote improved blood flow to the treatment area.*

### Who is a good candidate?

*Individuals that are suffering from hair loss or that want to improve the overall thickness and appearance of their hair.*

### How many treatments are required?

*During your consultation, your provider will assess your hair to personalize a treatment plan for you. Best results are typically seen after 3 treatments, spaced 1 month apart. Although noticeable improvements may be seen after 2 weeks.*

### How long does each treatment take?

*This will vary based on your personalized treatment plan recommended by your provider. Average treatment time takes 20-25 minutes.*

### Does it hurt?

*The Alma Ted is a pain-free treatment. You can expect to feel a warm sensation from the device and a ringing sound through the course of the treatment, but there is no pain involved. No needles, no discomfort. No trauma to the scalp.*

### What is the downtime?

No downtime.

### What should you expect after your first treatment?

*Alma Ted helps to improve the appearance of hair resulting in thicker, fuller-looking hair with increased shine and strength.*
